Portfolio: portfolio-sreya.vercel.app

Summary

Full-stack MERN developer with production experience independently building web applications using React, TypeScript, Node.js, and MongoDB. Skilled in REST API design, component-based UI architecture, and agile sprint delivery. Proficient across both MERN and .NET ecosystems .

Education

Cochin University of Science and Technology

Master of Computer Applications GPA: 8.80/10

July 2024 – Apr 2026

Mahatma Gandhi College, Kannur University

Bachelor of Science in Mathematics GPA: 9.32/10

Oct 2021 – May 2024

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, Java, C#

Frontend: React.js, Angular, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, ASP.NET Core, REST APIs, JWT Authentication

Databases: MongoDB, MySQL, SQL, Entity Framework Core

Tools & Platforms: Git, GitHub, Postman, Vercel, Railway

Cloud & Deployment: Microsoft Azure, Docker, CI/CD, AWS

Core Concepts: DSA, OOP, SOLID Principles, Version Control

Experience

Software Developer Intern — Weberfox Technologies

Dec 2025 – Apr 2026

- Delivered production ERP modules using React.js and TypeScript in a live enterprise environment
- Engineered RESTful APIs with Node.js and Express.js for invoice processing, stock tracking, and analytics workflows
- Implemented stock deduction, low-stock alerts, and expired product handling to automate inventory management
- Built responsive dashboards with reusable React components ensuring consistent UI across all ERP modules
- Resolved critical bugs through systematic debugging and API validation using Postman across agile sprint cycles

Projects

ERP Management System — React, TypeScript, Node.js, Express.js, MongoDB

- Independently architected and delivered a full-stack ERP system from scratch covering inventory, sales, purchase, quotation, and billing in a unified platform
- Designed and integrated RESTful APIs for CRUD operations, real-time inventory updates, and dashboard analytics
- Developed automated invoice generation and stock deduction modules, eliminating manual billing steps
- Built modular, reusable React and TypeScript dashboard components following clean architecture principles

Employee Management Application — Angular 17+, TypeScript, .NET 10, C#, Entity Framework Core, SQL

- Engineered a full-stack EMS with role-based access control across admin, manager, and employee portals
- Built RESTful APIs using ASP.NET Core for employee, department, and designation management with EF Core
- Implemented secure JWT authentication and CRUD operations across all user roles
- Applied component-based Angular architecture to build scalable, maintainable modules

Confidence Analyser — Python, React, Next.js, FastAPI

- Built an ML-based app to analyse and visualise speaker confidence levels in real time from video input
- Designed a FastAPI backend for feature extraction, model inference, and REST API integration with the frontend
- Optimised the data processing pipeline to improve prediction accuracy and reduce inference latency
- Delivered an end-to-end system integrating a React/Next.js frontend, FastAPI backend, and ML models

Certifications

Microsoft Full-Stack Developer Professional Certificate

Coursera — 2026

Data Structures and Algorithms (DSA)

Coursera — 2026
